

TDR-12 **Tri-Deck Roller Finishing Mower**

Value + Performance

Progressive's 12 foot Tri-Deck Roller Mower (**TDR-12**) is designed to maintain wide area mowing venues that require a superlative after cut appearance. The superior quality of cut, coupled with the **TDR-12's** rugged construction, ease of maintenance and competitive price, give the **TDR-12** the versatility to tackle a wide variety of mowing applications.

The **TDR-12's** full length rollers, which allow the **mower** to cut as low as $\frac{1}{2}$ " while simultaneously rolling the mowing surface, make it ideal for athletic fields, equestrian facilities and golf courses. Cutting heights are quick and simple to set with the supplied tool to any height from $\frac{1}{2}$ " to 4". Maintenance Free Blade Spindles offer peace of mind and lower cost of operation.

The **TDR-12** is another example of the ingenuity and quality that goes into producing a durable, reliable rotary finishing mower that is easy to maintain. The **TDR-12** is not only a Value and Performance leader, it is "The Better Built Choice".

The Better Built Choice.™

TDR-12B Tri-Deck Roller Finishing Mower Features and Benefits

A superior cut:

With a tip speed over 18,000 feet per minute, our high lift blades provide superior vacuum to stand grass up to be cut cleanly and then evenly discharged over the rear rollers.

Provides a clean even cut at ground speeds of up to 6 miles per hour depending upon conditions.

Easy to use and maintain:

Maintenance Free Blade Spindles are used to both lower cost and time of routine maintenance. They also provide peace of mind that a missed greasing won't render the mower out of service. Mower adjusts quickly for multiple mowing height applications, with infinite cutting height adjustment from 1/2" to 4".

If the mower needs to be transported on public roads, optional fenders are available (shown) . All pivot points are fitted with easy to reach grease fittings, making servicing the TDR-12B fast and simple.

Pro Lift-N-Turn™

Progressive's exclusive Pro Lift-N-Turn™ system is standard equipment. Operators have the ability to slightly raise the decks off the ground with the PTO still engaged, making turning easier on the turf as the weight of the mower is distributed between the tractor and the floatation tires. An automatic stop prevents the main decks from raising too far.

TDR-12B Tri-Deck Finishing Mower Specifications

Part Number:	TDR-12B 528712B	Recommended PTO HP:	25-40
Cutting width:	12 feet	Weight:	3,400 lbs
Mowing Capacity*:	2 mph 2.9 acres / hour	Transport Width:	7 feet
	4 mph 5.8 acres / hour	Transport Height:	7.5 feet
	6 mph 8.7 acres / hour	Transport Length:	14 feet
Turning Radius:	24" uncut circle		
Transport Tires:	Two P275 / 60 SR 15 automotive tires (standard)		

*Assumes no overlap or turning
